

# VOTING SYSTEM

## ATTENDANCE INTO INVOLVEMENT

The Abbit voting system transforms standard PPT into a powerful two way communication tool that captivates the participants' attention. Through a PPT, trainers and speakers can display questions, surveys, opinion polls and complex problems that require everyone in the room to select a response via their input device. All responses are transmitted to the presentation computer for data collection.

## PARTICIPANTS INTO ASSESSMENT

The system delivers immediate feedback to participants, trainers and speakers. As a result on-the-spot assessments of all participants or that of an individual participant can be conducted at any point during your presentation. After the voting session you receive a digital report of all available participant information.

## FUNCTIONALITY HIGHLIGHTS IN A NUTSHELL

- Demographic splits and groups:** Organize and report response data at the workshop composite level, by assigned group and/or by participant.
- Reporting:** The voting system organizes participant response data at the individual, group, division or corporate levels.
- Data slicing:** View participants responses in real time grouped by demographic type for an individual question.
- Compare results:** Present a question to your participants – later in the workshop present the same question and automatically display a side-by-side comparison of results.
- Picture response:** Create a slide where text is replaced with pictures, graphs, equations and/or symbols linked to response choices.
- Participant monitor:** At anytime during your session instantly see how participants are responding to questions and how they compare with the overall group.
- Scoring, competitions and teams:** Assign points to correct answers. Track points by assigned team. Display competitive standings through dynamic scoreboards. Use speed scoring to reward participants for the fastest response.
- On the fly slide:** Insert slides without leaving your presentation

## HOW TO USE THE VOTING SYSTEM

### Timing

- Send questions at the latest 10 days before the event.
- You receive them back for reviewing at the latest 1 week before the event

### Remarks

- Maximum 9 possible answers for voting
- Use the standard PowerPoint bullet numbering
- Keep at least font size 24
- Do not use more than one slide for one question
- Keep answers short (within the textbox)
- Mark the correct answer in green if you want to make use of correct answer indication

### PRICING (DAY RATES)

- Production & input of questions 200,00 euro
- Computer hardware & voting software 185,00 euro
- Voting pad per participant 5,00 euro
- Voting technician 395,00 euro

*Insurance, administration, travel & VAT not included*
